

COLORING SYSTEMS

COLOUR-DYE™

Description

Colour-Dye™ penetrates the surface of concrete, creating a layer of translucent color that dries quickly and will not chip, crack, or peel. Colour-Dye™ is packaged in powdered form to be mixed in proportion with acetone. Colour-Dye™ is excellent in vertical applications, stencils, and logos because it dries so quickly. Colour-Dye™ colors are vivid with unique multi-colored intensities, similar to the mottling effect of acid stain. Colors can be combined to create an unlimited number of color variations.

- Interior Use
- 12 Colors Available
- Easy To Spray Apply
- Dries Quickly
- Ideal For Polished Concrete
- Use Any Spray-On Sealer

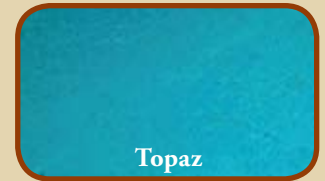

Colour-Dye™ Colors Available:
