Legacy™ DECORATIVE
CONCRETE
SYSTEMS
A DIVISION OF SOLOMON COLORS, INC.

Legacy's® suite of decorative stains provide permanent, long lasting color to concrete surfaces. Both the Tinté D'Acqua™ water-based stain and Fresco™ reactive stain prevent exposure to Volatile Organic Compounds or VOCs.

While all Legacy® stains are notable the Fresco Stain™ is especially unique. Its composition stands alone, as it is the only reactive stain on the market made without hydrochloric acid, making it much safer to use and handle. It is also the only stain that may be shipped as a non-hazardous material. Finally, Legacy® stains are the only stains on the market that do not use Sodium Dichromate, a cancer causing chemical present in large quantities in comparable formulations.

VOC Limits

Product	Actual VOC g/l	SCAQMD #1113 (LEED Standard)
Fresco Stain™	0	100
Tinté D'Acqua™	0	100

FRESCO STAIN™ FEATURES

- Chrome VI free, no cancer causing chemicals
- No Hydrochloric Acid
- D.O.T. Non-Hazardous, Shipping Certified Stain
- Only "Green" acid stain in the world
- No harmful fumes
- More user friendly than comparable products
