“Water-Based Stains: Vibrant Color Equals Added Value”

Springfield, IL - May 2007 --Legacy Decorative Concrete Systems, Inc., a leading manufacturer of decorative concrete overlays, colourants, protectants, stains and tools; recently launched Tinté D’Acqua™ an innovative, environmentally friendly water-based stain. This state-of-the-art product, available exclusively at Legacy, achieves a rich, natural appearance on concrete floors and other porous mediums. Benefits of the Tinté D’Acqua™ product line include excellent penetration into concrete surfaces providing a long lasting wear surface; they contain no hydrochloric acid keeping the environment safe and clean; they provide more protection from everyday wear and tear, and they offer UV stability.

Legacy’s Tinte D’Acqua™ has a wider range of color possibilities and they offer more color control than other concrete coloring systems. Twenty-eight vibrant colors are available exclusively through Legacy or blend Tinté D’Acqua™ colors together to create additional shades of your choice. (A test slab is recommended before starting any job).

Apply Tinte D’Acqua™ over new and existing concrete floors, patios, driveways, smooth troweled or textured concrete, cement based overlayments, vertical or horizontal concrete, masonry surfaces, artificial rock displays, water features, and themed finishes. Tinte D’Acqua™ helps to create a look that’s fresh and innovative but affordable for most any use and they add value to any project.
